

Montgomery Medical Practice

Patients' Association

Rural general practice is in a fragile position but Montgomery is continually striving to maintain a high standard of care. This has been recognised by a recent Health in Wales inspection which rated Montgomery Practice as OUTSTANDING, the only practice in Wales to receive this accolade. There is now a full clinical team in place bringing in new initiatives to improve patient care and staff are working to maintain the valued ShropDoc service for patients.

MMPPA's main roles are to:

- help and support the Practice providing a positive, proactive link between patient and doctor;
- facilitate funds in conjunction with the doctors' needs ensuring all donations best benefit the practice and patients;
- support and speak for patients who need our assistance, and
- provide an informal channel for suggestions and general complaints.

MMPPA consists of local representatives from communities served by the Practice. We meet 3 or 4 times a year at the Practice with meetings being held from 5pm - 6pm on a weekday. . At this challenging but exciting time we would like to extend the membership to ensure a good representation. If you are interested or would like any further information please contact:
